

climes' first newsletter

January-August 2024

The *Swedish Centre for Impacts of Climate Extremes* (climes) is a platform for research and training to promote scientific progress in the study of climate extremes and support societal resilience. The centre bridges the physical, medical, social and engineering sciences.

Get to know climes! We're excited to engage with experts and policymakers to foster impactful environmental changes.

Learn more about our mission and vision at climes.se.

Climes Kick Off Event – A Resounding Success!

On April 26, we officially launched climes with a dynamic event attended by key stakeholders. Highlights included expert panels and engaging discussions on climate initiatives. Access recorded lectures at climes.se/kickoff.

First External Advisory Board Meeting

Our first Advisory Board meeting brought together esteemed members committed to steering climes towards impactful research and policy advice. Learn about our board members' diverse expertise and roles:

Welcome Our New Post-Docs: Sanja and Murathan

We're thrilled to introduce Sanja Duvnjak Žarković and Murathan Kurfalı as our new postdoctoral researchers. Sanja, from Uppsala University's Department of Earth Sciences, focuses on the impacts of extreme weather on power systems, enhancing resilience through security of supply concepts. Murathan, based at RISE, applies advanced natural language processing to analyze the societal impacts of climate change.

Discover more about their groundbreaking work at climes.se/about#researcherprofiles

Climes Summer School 2024: Thanks for a great run!

From June 17th to 20th, the climes Summer School took place at GeoCentrum, Uppsala University. The event covered themes like Climate Extremes, Differential Climate Impacts, and AI in Climate Science. Participants engaged in lectures, exercises, and networking events, led by experts including Prof. Ramón Fuentes Franco and Prof. Emily Boyd. Learn more about the sessions and lecturers at climes.se/summerschool.

Publications

Discover the latest advancements in climate research from Climes. Our publications cover a range of critical topics, from hydrological extremes to the effects of climate change on healthcare systems, shaping the study of climate impacts.

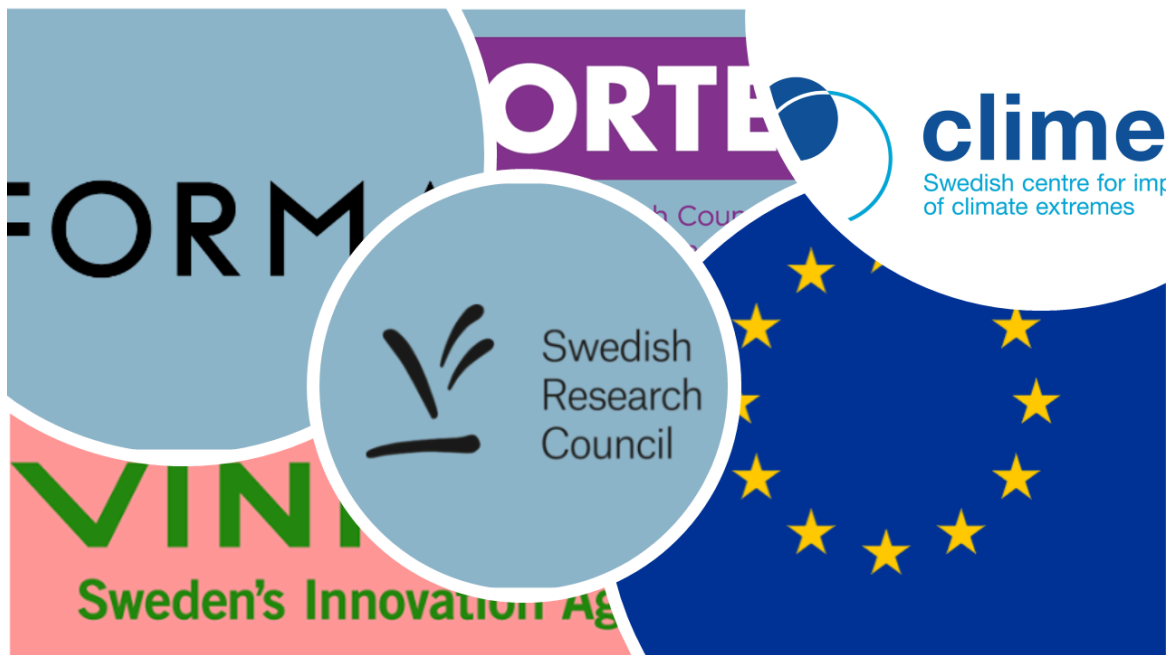

Explore our recent publications at climes.se/research.

Related projects

Explore projects related to climes, where our researchers lead innovative initiatives to understand and mitigate climate impacts. From developing advanced climate databases to pioneering ecological monitoring techniques, discover the diverse and groundbreaking work being conducted within climes.

Learn more about these exciting projects at climes.se/relatedprojects.

Meet our project administrator

We are pleased to announce Sakıp Murat Yalçın as the new project administrator for climes. Murat brings extensive experience in agile project management and SCRUM, with a background in cultural institutions, education, and digital inclusion.

Alongside his role at EDIPI, Murat also serves as the project administrator for the EDIPI project (www.edipi-itn.eu) and runs SM Yalçın Consultancy (smyalcin.se).
